

We're the rain on the roof in a movie. The music flowing through your earbuds when you're at the gym. The footsteps lurking behind you in a video game. The voice of a colleague on a call who seems to be right next to you. The sight of a breathtakingly bright and vivid sunset on your TV.

## WHAT WE DO

Making experiences come alive through technology is what we do. It's been our mission since day one.

### THE SCIENCE OF ART

Dolby Laboratories is home to hundreds of scientists and engineers dedicated to the study of human perception, the experience of artistic immersion, and the joy of creative invention. We pour our genius and imagination into technological breakthroughs that transform today's audio and visual experiences in ways you never thought possible. And we're just getting started.

## WHO WE ARE

### HIGH TECH WITH A HUMAN TOUCH

Even as we've become a global company, Dolby Laboratories continues to reflect our founder Ray Dolby's values, which fostered intellectual curiosity, individual creativity, and teamwork.

Here, science meets art — and high tech goes far beyond code.

### OUR PEOPLE

We are an eclectic mix of scientists, engineers, and enthusiasts from diverse backgrounds, focused on complete solutions that revolutionize how people create, deliver, and enjoy entertainment worldwide. We emphasize quality and we prize integrity, earning the trust of our partners and customers.

### HOW YOU FIT IN

We offer a collegial and inclusive culture, challenging projects, and competitive compensation and benefits. As part of our team, you'll be able to be yourself, and do your best and most fulfilling work on projects that matter. You'll see and hear the results everywhere, from cinemas to smartphones.

We believe diversity of thought and experience is essential to solving tough problems and creating best-in-class technologies. We encourage people from all backgrounds and perspectives to come work with us.

### UNIVERSITY RECRUITING

We focus on providing university students the opportunity to receive experiential learning that integrates knowledge and theory gained in the classroom with practical application and skills development in a professional work setting. Our goal is to spark creativity and innovation, and introduce Dolby technology to a whole new generation of users.

For more information on how you can become part of our program, email us at [universityrecruiting@dolby.com](mailto:universityrecruiting@dolby.com).

### DOLBY CARES

At Dolby, we believe in the importance of being actively engaged in our communities around the world. We develop partnerships with local organizations and schools, providing financial and in-kind support, and most importantly, engage Dolby employees as volunteers. Together we strive to inspire the next generation of innovators as well as to address the most critical needs in the communities we call home.
